## **Navy training headquarters names top civilian**

PENSACOLA, Fla. – The Naval Education and Training Command (NETC) announced Nov. 21 the Senior Civilian of the Quarter (SCOQ) for the third quarter of FY-14.

Rear Adm. Mike White, NETC commander, commended his civilian staff as an indispensable part of the education and training mission.

“Our civilian employees are a critical component of our warfighting capability and are crucial to our ability to enable fleet readiness and respond to fleet needs,” said White. “Although it’s always a close competition, honoring the civilian of the quarter highlights a shining example that’s representative of the highly-trained professionals we have throughout the Navy training domain. The exemplary work carried out by these patriots every day in training commands around the world is key to the success of our Navy and Marine Corps team.”

Kelly Looney, a program analyst in the Planning and Metrics Branch of the Development, Planning, and Analysis division, was named SCOQ. According

to Looney, transitioning from military life to civilian service allowed her to continue serving her country.

"I definitely look forward to coming to work every day," said Looney. "After retiring from military service, I hoped to find a job that continued to provide some of the challenges and rewards that I experienced serving in the Navy. My current position in N5 allowed me to develop a measurement system that will help drive decisions in the training and education enterprise and help ensure that our Navy-Marine Corps team gets the training necessary to support fleet readiness."

Michele Harrison, the Planning and Metrics branch head and Looney's supervisor, described her performance and professionalism as exceptional.

"Ms. Looney's efforts have made a significant contribution to NETC's mission and operations," said Harrison. "She developed a model to calculate performance indicators that measure the speed at which students enter the initial training path by rating, validating the training measurement process and explaining the concept and business rules to the learning centers, ensuring their full support for the initiative. Her efforts will show significant benefits for the foreseeable future."

NETC is the largest shore command in the Navy and is comprised of more than 12,000 military and staff personnel at more than 230 subordinate activities and detachments in the United States and at remote sites overseas. NETC provides training and education to more than 31,000 students on any given day.
