

- a. Principles
- b. Administration

F. Inspections

- 1. Purpose: To evaluate and maintain efficiency, morale, and discipline, not to find fault
- 2. Types
  - a. Administrative
  - b. Operational
  - c. Material
- 3. Impact on unit integrity and morale

G. Five Vector Model (5VM)

- 1. The 5 Vector Model (5VM) is a tool for both Sailors and the Navy that will be an interactive and executable career roadmap and planner that:
  - a. Precisely maps and measures career progress.
  - b. Identifies learning resources that lead to achieving career milestones.
  - c. Allows Sailors to identify and diagram different career paths.
  - d. Gives Sailors the ability to measure their advancement potential against others.
  - e. Provides Sailors a tool that allows them to identify and apply for educational opportunities and duty stations.
- 2. The continuum addresses professional and personal development, professional military education and leadership, certifications and qualifications, and performance as Sailors move through the recruit, apprentice, journeyman, and master career phases.
- 3. The 5VM will illustrate Sailors' current qualifications in terms of SkillObjects™, enabling each Sailor to map his or her career.
